

## **Muhammad Baber - Write Up**

The contribution from myself with HSE roles at different projects is completing the following projects without breaching the compliance of relevant applicable standards, legal and statutory requirements.

In Turn Around 2020 ADNOC Rowais Refinery East – Abu Dhabi 2019-2022, the risk assessments of all units comprising 900 plus equipment was conducted in a limited time frame. I managed the talented team in a big number of 5500, equipment and transport, to cover multifaceted activities. The total period of 260 Days covering 2.6 million safety hours was completed without a single LTI.

In HSE Supervision Paramount Hotel Construction - DUBAI -2018, safety compliance was done for the project in construction of a 65-floor Hotel Building by the China State Construction Company Paramount Hotel Construction project. There was no LTI and no Non-Compliance recorded.

Third Party Inspection was done for the MS frame having a length of 23.5 meter long and 3.5-meter width. This frame has to lift 110 M Ton load. It had to be tested vertically from both ends through its hooking points. No LTI and no Non-Compliance was recorded.

Large Earth Work Projects - Shakarganj Mills Ltd. Pakistan 2013-2014 include construction of Molasses Storage Pond size 120 x 60 x 5 Meter – Capacity 36,000 M3, the construction of 3 Water Storage Lakes size 60 x 60 x 7 Meter - Capacity 30,500 M3, and the excavation for the construction of CO2 Recovery Plant size 32 x 28 x 3 Meter. The above projects were constructed on an emergency basis to get the space of molasses and water storage. The target time for completion was 150 days but it was completed in 130 days and handed over to management with zero LTI.
