

Oluwasegun Abdulwaheed - Write Up

Safety is not just a profession for me, it is a passion. I founded the Largest African HSE platform in GCC in 2017 with over 8 whatsapp groups and a website. This is where common goals and objectives of mentoring young HSE professionals are being done. Various services to humanity is carried out by rendering support to the needy across the team.

Currently, we have our members from the African HSE groups holding various positions in different organisations around the world with support from the Group either through mentoring, or direct and indirect job supports.

I always say that safety is about care and responsibility which is my core value.
