

Wayne Koh - Write Up

Wayne Koh is a Health, Safety and Environmental professional with more than 20 years of experience across a wide range of industries including railway, special waste management and building construction career. Holding dual roles of Head Safety & Security & Head Rail Risk in SBS Transit Rail Pte Ltd, Wayne has a proven track record in managing multiple contingents, projects and maintaining positive relationships with stakeholders. He has also been invited to speak at forums organised by government agencies, sharing his knowledge and oversights in Health, Safety and Environment.

Over the last 2 years, during the COVID-19 pandemic, Wayne assumed a leadership role within his work organisation with direction and the allocation of resources during the initial outbreak of Covid-19. This was especially important in the post-COVID era where there is a need to manage both traditional WSH as well as Safe Management Measures to curb the transmission of virus at the workplace and community.

Wayne is also actively organising Safety Seminars such as SHAPE (Safety & Health Programme) and Rail Safety Day with an outreach to all railway staff and contractors, inviting external agencies such as SPF, WSH Council and even psychologists to provide their valuable inputs pertaining to WSH. His contribution and organising in these seminars provided the knowledge that the attendees can use to deliver impact and value in their workplace.

Wayne is a strong believer of outreaching safety values to all and for them to internalise safety values in all that they do. His vision is simply a safe and healthy world of work.
