

Aslan Che Mi - Write Up

Aslan has been in the safety and health field for more than 18 years, working in several companies. He has seen and experienced the challenges faced by the industry while working in diverse industries such as; tunnel and road construction, automotive, fabrication, oil and gas, chemical, warehousing and transportation, pharmaceutical and medical devices, mining, and manufacturing sector.

Aslan grew up in Kulim, Kedah. He entered Universiti Putra Malaysia to study Engineering Emergency and Safety, the first course in Malaysia. While in UPM, he joined the Reserve Officer Training Unit and was commissioned as a military officer–1st Lieutenant in 2003. Aslan holds a Master's Degree in Safety, Health and Environment from Selangor University (UNISEL). He is also certified as a Safety and Health Officer, authorised Gas Tester, Dangerous Goods Officer and is a TAPA Auditor.

Between 2017 to 2021, Aslan has rolled out the EHS implementation and standardisation for all business unit BU's in APAC including Philippines, Vietnam, Cambodia, Thailand, Hong Kong, Singapore and Taiwan. During his time, Malaysia and Brunei have been awarded Best Site for Health and Safety Awareness Program for two consecutive years, 2019 and 2020.

For Aslan, working safely and creating a safe work environment is not optional for employment – it's a necessity. Everyone has a personal responsibility to drive a positive result in the key areas of the business and safety is certainly one of those areas.

He believes that people don't just suddenly change their minds about safety. They make new decisions based on new information. So keep presenting safety in new ways!
